*Dr. T.C. Wallace, Jr., Superintendent, Mt. Clemens Community Schools*

Middle Cities Education Association represents 33 urban school districts in Michigan that are collectively responsible for educating more than a quarter million children each year. Because of our size, our location and the diversity that exists within our student bodies, we often approach our successes and challenges from a perspective that is unique to our districts. Whether celebrating achievements or sharing our frustrations, Middle Cities provides superintendents, central office administrators and other district staff members with a forum that facilitates mentoring, leadership and problem solving. Middle Cities offers an unrivaled service in that regard that has been cited by its members to be one of its best benefits.

My term as president of Middle Cities encompassed some groundbreaking changes for both the association and for our schools. The association, along with Middle Cities Risk Management Trust and Workers' Compensation Fund and North Central Accreditation, took occupancy of our new building which opened in the Fall of 2005. The building has helped facilitate continued levels of high service that we have come to expect and appreciate from the Middle Cities organization. The partnership with NCA will also provide some exceptional professional development opportunities for all of our districts as well.

I also had the opportunity to represent Middle Cities on the Michigan Association of School Administrators' Legislative Committee. Among the major legislative issues for the committee was the Criminal Records package and the Revised High School Graduation Requirements. Also, as your President, I had the opportunity to represent our participation in several K-16 Coalition initiatives.

In closing, I would like to recognize executive director Ray Telman and his staff for their tireless efforts to keep superintendents and districts' staffs updated on a multitude of issues, for their excellent service and for their unparalleled work on behalf of urban learners.

# MCEA VALUES

---

## **Integrity Without Compromise**

Having integrity means being honest and forthright with ourselves and in working with our members and each other. Moreover, we say what needs to be said not simply what people want to hear. Above all else, be true to our mission and values.

## **Do Right by All Our Customers**

Doing right means acting with the best interests of the other party in mind. We treat each other, our business partners and our colleagues with the same care and respect with which we treat our members.

## **It's the People**

We have great people who want to do well, who are committed to our mission, who are capable of doing great things, and who come to work fired up to achieve them. Great people flourish in an environment that liberates and amplifies their energy.

## **Excellence Through Continuous Improvement**

We seek to adopt the best ideas and to be the best at whatever we do. We believe we can always get better. We strive continually to improve our processes, to help people do their jobs better and to produce high quality services and products.

## **Teams Work**

Believing that Together Everyone Achieves More, we promote a culture of teamwork. Working in cooperation with others leads to better solutions and success for all. In a quality team, empowerment partners with ownership.

## **Listen, Understand, and Respond**

We have a responsibility to create an environment that encourages people to speak openly, knowing they will be listened to when they do. Listening, however, is only a first step. It's also key to verify our understanding and to respond - if not through direct action, then through acknowledgement or feedback.

## **Members Define Quality**

Part of adapting to changing member needs and desires is knowing what our members want. We actively solicit input from our membership.

## **Think Forward, Think Boldly**

We are continually in search of forward thinking people, new ideas and new possibilities. We support courageous behaviors necessary to go forward in the face of risk. We look beyond conventional borders to find fresh perspectives.

## **Attention to Detail**

We strive for simplicity, clarity and accuracy to help our audience understand the message. We look with a critical eye to eliminating the unnecessary. Clutter is catastrophic. It's often the lack of attention to little details that trip up the best ideas.

## **We Care and Give Back**

We seek to contribute to our community in ways that reflect broadly held values, have meaningful impact, draw on our unique strengths as a service organization, and, whenever possible, reinforce our goals.

# ***EXECUTIVE DIRECTOR'S MESSAGE***

*Raymond S. Telman*

It is my honor to present the 2006 Middle Cities Education Association Annual Report. The Annual Report serves as a record of activities and initiatives impacting MCEA districts. I trust that you will find this document both informative and useful. Within this report, you will find a summary of our activities over the course of the past year, a review of legislative and governmental activities, reports from task forces and statistical information relative to our member districts.

Middle Cities Education Association is a unique organization with a clear mission relative to urban schools in Michigan – to serve as an advocate for our member districts to insure quality educational programs for all students. That mission is apparent in all the activities reviewed in this year's edition of the MCEA Annual Report. From task force meetings to work on legislative issues, MCEA superintendents, task forces and staff are dedicated to using their considerable talent and industry in focusing on student success in Michigan's urban centers.

Each month during the school year, our task forces come together to gather information on statewide initiatives and to network with other urban school colleagues regarding programs, initiatives, concerns and challenges. The 2005-06 school year was another successful year with regard to task force participation.

I am proud of the efforts of MCEA members and staff. Our members are sophisticated and hardworking, and their leadership reflects those qualities. As our school districts prepare for the challenges, successes and opportunities that are sure to come our way over the course of the next school year, MCEA will continue to advocate for Michigan's urban school districts as we strive to make our mission a reality.

# GOVERNMENT RELATIONS

*William H. Tunncliff, Legislative & Governmental Liaison*

## LEGISLATIVE INITIATIVES

The administration and legislative leadership worked hand-in-hand during 2005-2006 to enact legislation focused primarily on two issues: **Criminal Records Background Checks** on school employees, ostensibly to rid our schools of sexual predators; and mandatory **High School Graduation Requirements** which reflect many of the recommendations of the **Cherry Commission Report** released in the prior year. Indeed, if the two branches worked as cooperatively on other issues such as jobs development and tax restructuring, we might be witnessing some progress in recovering the state's economy.

The so-called "**Safe Schools**" legislative package which became effective January 1, 2006 provided for expanded and improved criminal records background checks on all current school employees; a requirement to terminate school employees convicted of sex related offenses as well as certain other felonies; board of education and superintendent hearings to determine the continued employment of those convicted of certain felonies; a reporting requirement for those charged with certain criminal offenses, etc. Further legislation imposed a 1,000 foot safety zone around schools prohibiting sex offenders from living, working, or loitering around the premises. Amendments to the tenure act allowed for the cessation of pay following arraignment on certain charges pending final outcome. The early stages of implementation were fraught with blunders, media hype, mistaken identities and the like. Eventually amendments were passed resulting in a focus on the most serious offenses with more safeguarding of individual rights of those wrongly identified or with relatively minor convictions.

The **High School Graduation Requirements** signed into law by Governor Granholm in April, 2006 represent perhaps the most significant body of education-related legislation since the passage of Proposal A in 1994. The effort to mandate high school graduation requirements effecting all Michigan school districts and school children evolved from the

recommendations of the **Cherry Commission** and were prompted by the Governor's goal to double the number of college graduates in Michigan in the next ten years. The **Michigan Department of Education** began the process in the fall of 2005 with recommendations to the **State Board of Education (SBE)** which approved its proposals in December. The SBE plan called for high school diplomas to be awarded only after completing a prescriptive set of requirements which included: 4 credits in language arts, 4 credits in mathematics (including Algebra I, Geometry and Algebra II), 3 credits in science (which included Biology and Chemistry or Physics), 3 credits in social studies, 2 credits in world language, 1 credit in health and physical education and 1 credit in the arts. Modifications to the requirements were available only at the end of the junior year. Both the House Education Committee (chaired by Representative Brian Palmer) and the Senate Education Committee (chaired by Senator Wayne Kuipers) moved the recommendations to the highest priority of their respective committee agendas and conducted numerous hearings, with the Senate Education Committee holding hearings at intermediate school districts throughout the state. The result was the passage of **HB5606 (Public Act 123 of 2006)** and **SB1124 (Public Act 124 of 2006)**. The major deviation from the SBE recommendations is that the world language requirement can be satisfied in the lower grades and is applicable beginning with the Class of 2016; the modifications are much more restrictive; and, the application to the special needs student population is in question. During the SBE consideration and throughout the hearing process there was a belief that a student's Individual Education Plan "trumped" the graduation requirements. Under the legislation as passed that issue remains unclear.

The Middle Cities Education Association has committed to the task of working with MCEA member districts to promote understanding and to assist in the implementation of the new requirements. The challenge to instructional staff and principals is immense; but the rewards in the form of increased student achievement and college readiness dictate our finest effort.

### SCHOOL FUNDING

The school funding issue improved somewhat during the past year as **School Aid Fund (SAF)** revenue sources grew at a rate slightly above inflation and student memberships experienced a sharp decline. The **Revenue Estimating Conference** in January projected the SAF revenues for FY06-07 to increase by \$360 million (3.21%). At the same time, enrollment was estimated to decline by 5,100 FTE memberships in FY-06 and an additional 8,400 FTE's for FY-07 bringing the total membership down to 1.69 million. This, of course, provided sufficient revenue to provide moderate increases for K-12 education. The cooperation between the administration and legislative leadership evident in education policymaking carried over to the school funding arena. The result was the passage of **SB1095 (Public Act 382)** signed into law by Governor Jennifer Granholm on August 15. The major highlights of the **School Aid Act** for FY06-07 include: (1.) \$210 per pupil increase in the foundation allowance (\$7085); (2.) an equity payment of \$23 per pupil for eligible districts (12 Middle Cities districts); (3.) a "Declining Enrollment" categorical payment for eligible districts (25 Middle Cities member districts); (4.) a \$6 million

increase in funding the Michigan School Readiness Program to serve more students; (5.) a “Middle School Math” categorical providing \$54 per student in grades 6-7-8 to improve student performance in math; (6.) an increase of \$3 million for Adult Education; (7.) increasing the Retirement Rate from 16.34% to 17.74%; and (8.) a reduction of \$28 million in the General Fund Supplement to the SAF bringing the contribution down to \$35 million.

Other efforts to address the school funding issue remained on the front burner throughout the past year. Efforts toward cost containment, particularly with respect to the high cost of employee’s health insurance and escalating retirement system costs, met with considerable opposition. The major House proposal (HB4947) addressing reforms in the retirement system focused on graded health premiums for new hires and restrictions on the purchase of service credits as well as changes for new hires from a defined benefit to a defined contribution system. Senate proposals (SB635-636) provided for the release of claims data for soliciting bids on health insurance as well as easing requirements relative to insurance pooling. These initiatives, also, received sufficient opposition but are still on the back burner; perhaps returning to the forefront during the upcoming “Lame Duck” session.

The **K-16 Coalition** continued its efforts to provide guaranteed funding for K-12, community colleges and universities. The Coalition conducted a campaign to place its proposals before the legislature during the fall of 2005. It collected well in excess of the 247,000 signatures necessary to place its initiative before the legislature. The legislature had 40 days to accept the proposals (deadline July 15) or allow the initiative to go before the voters on November 7. They declined to vote on the issue and, hence, chose the latter. The ballot initiative **Proposal 5** calls for an annual inflationary increase in funding K-16; provisions for gradually closing the equity gap in the foundation allowance; funding relief for districts with declining enrollment and a cap on the retirement rate at approximately 14.87%. Middle Cities Education Association has been an active member of the K-16 Coalition since its inception. It is our position that educational funding stability is absolutely essential if we are to provide our students with the tools necessary to compete for jobs in the global marketplace and improve our state’s economy. Our students deserve nothing less!

## **2006-07 TASK FORCE ACTIVITIES REPORT**

MCEA Task Forces are a key vehicle for communication, leadership, mentoring and networking. The task forces, each with representation from MCEA districts, meet monthly during the school year to focus on their areas of specialization and promote success among urban students. Each task force is assisted by MCEA staff members who facilitate their efforts. The task forces play a key role in state and federal policy matters and often work on issues of common concern.

During the 2006-07 school year, a timely and thought-provoking series of Lead-In programs complementing the monthly task force meetings continued to generate strong attendance. The intent of the lead-in programs is to provide information while promoting communication and collaboration among MCEA Task Forces. Oftentimes, the lead-in speaker will meet with task force members following a presentation to answer questions and get feedback from Middle Cities districts. A summary of the 2006-07 lead-in programs and task force activities follows.

### **Friday, September 8, 2006**

**Looking Back... Looking Forward - Sue Carnell**, Education Advisor, Gov. Granholm's Office and **Bill Tunnicliff**, Governmental & Legislative Liaison, MCEA. **Sue Carnell** addressed recent education initiatives undertaken by the administration and discussed plans the administration would be addressing during the upcoming year. **Bill Tunnicliff** picked up where we left off last year with the new high school graduation requirements. These new requirements continued to be the focus of Middle Cities Task Force activities throughout the upcoming school year. Bill specifically addressed activities every school district should be considering.

### **Wednesday, October 5, 2005**

**Gimme 5! - Ken MacGregor**, Spokesperson for the K-16/Proposal 5 Coalition. Ken MacGregor provided an update of the Grass Roots Lobby Campaign, an important election opportunity for educators.

### Wednesday, November 1, 2006

**Talking About Testing - Dr. Ed Roeber**, Senior Executive Director, Office of Educational Assessment and Accountability, Michigan Department of Education. Dr. Roeber addressed such questions as: What's new relative to the Michigan Merit Exam? What was the outcome of the fall MEAP assessments? What's the status of the end of course evaluations?

### Wednesday, December 6, 2006

**What's New at OSI? - Dr. Yvonne Caamal Canul**, Director, Office of School Improvement. Dr. Caamal Canul provided information about changes with Education Yes! and other developments within the Office of School Improvement.

### Wednesday, February 7, 2007

**What Happens Now? - Chuck Wilbur**, Senior Advisor for Education and Communication, Governor Granholm's Office. As Middle Cities districts faced a potentially crippling proration, Dr. Wilbur provided information the Governor's plans to address our state's economic and education challenges.

### Friday, May 4, 2007

**Global Education in Middle Cities Schools - Dr. E. Sharon Banks**, MCEA President & Lansing Schools' Superintendent. Dr. Banks shared information about her district's Chinese Immersion Program. Dr. Banks was joined by **Dr. Chun Lai**, **Dr. Dongping Zheng** and **Nancy Romig** from the Confucius Institute who presented information about resources available for similar programming in Middle Cities districts.

### Friday, May 31, 2006
